WEEKLY REPORTING

MCA, Sem - 4

Submitted By

NAME	Harsh Shantibhai Rank
DEPARTMENT	MCA
DIVISION	I
ROLL NUMBER	33
ENROLLMENT NUMBER	24004401110301
POSITION	QA Tester
COMPANY	QAble Testlab
REPORTING PERIOD	02/03/2026 To 31/03/2026
SUBMISSION DATE	11/04/2026

Sr. No.	Section / Activity	Date	Time
1	Introduction	2nd March 2026	
	– Organization Overview – QAble Testlab Pvt. Ltd.		09:00 AM to 01:00 PM
	– KEKA attendance & reporting navigation		02:00 AM to 03:00 PM
	– Domain Insight – Software Testing & QA Practices		03:00 PM to 06:00 PM
2	Daily QA Work – Onboarding & Tool Familiarization	3rd March 2026	
	– Learned testing basics		09:00 AM to 01:00 PM
	– Test cases vs scenarios		02:00 AM to 03:00 PM
	– QA process and documentation		03:00 PM to 06:00 PM
3	Holiday on Dhuleti	4th March 2026	
4	Daily QA Work – Testing Fundamentals & Documentation	5th March 2026	
	– Explore real-world Domain		09:00 AM to 01:00 PM
	– Functional & UI testing		02:00 AM to 06:00 PM

Sr. No.	Section / Activity	Date	Time
5	Daily QA Work – SDLC, STLC & Testing Levels	6th March 2026	
	– Software domains basic understanding		09:00 AM to 01:00 PM
	– SDLC and STLC concepts		02:00 AM to 03:00 PM
	– Testing levels overview		03:00 PM to 06:00 PM
6	Daily QA Work – Testing Types & Test Strategy	9th March 2026	
	– Feedback implementation		09:00 AM to 01:00 PM
	– Test strategy and prioritization		02:00 AM to 03:00 PM
	– Smoke regression exploratory testing basics		03:00 PM to 06:00 PM
7	Daily QA Work – Understand Defect Lifecycle & defect priority	10th March 2026	
	– Defect lifecycle process understanding		09:00 AM to 01:00 PM
	– Severity and priority difference		02:00 AM to 03:00 PM
	– Bug handling and rejection reasons		03:00 PM to 06:00 PM

Sr. No.	Section / Activity	Date	Time
8	Daily QA Work – Requirement Analysis & Risk Identification	11th March 2026	
	– Requirement analysis basics		09:00 AM to 01:00 PM
	– Acceptance criteria understanding		02:00 AM to 03:00 PM
	– Risk identification concepts		03:00 PM to 06:00 PM
9	Daily QA Work – Test Scenario & Test Case Design	12th March 2026	
	– Test scenario design		09:00 AM to 01:00 PM
	– Test case writing basics		02:00 AM to 03:00 PM
	– Design techniques overview		03:00 PM to 06:00 PM
10	Daily QA Work – Test Execution & Build Validation	13th March 2026	
	– Test execution workflow		09:00 AM to 01:00 PM
	– Smoke testing basics		02:00 AM to 03:00 PM
	– Retesting regression concepts		03:00 PM to 06:00 PM

Sr. No.	Section / Activity	Date	Time
11	Non-Working Days – Weekend	14th & 15th March 2026	
12	Daily QA Work – Bug Reporting & QA Communication	16th March 2026	
	– Bug reporting basics		09:00 AM to 01:00 PM
	– Defect mapping concepts		02:00 AM to 03:00 PM
	– QA communication skills		03:00 PM to 06:00 PM
13	Daily QA Work – QA Documentation & Reporting	17th March 2026	
	– QA reporting basics		09:00 AM to 01:00 PM
	– Test strategy overview		02:00 AM to 03:00 PM
	– Test plan understanding		03:00 PM to 06:00 PM
14	Daily QA Work – UI Mobile & Cross Browser Testing	18th March 2026	
	– UI UX testing basics		09:00 AM to 01:00 PM
	– Mobile testing concepts		02:00 AM to 03:00 PM

Sr. No.	Section / Activity	Date	Time
	– Cross browser testing		03:00 PM to 06:00 PM
15	Daily QA Work – Agile QA & Sprint Execution	19th March 2026	
	– Agile QA basics		09:00 AM to 01:00 PM
	– Sprint testing workflow		02:00 AM to 03:00 PM
	– Standup communication basics		03:00 PM to 06:00 PM
16	Daily QA Work – QA Metrics & Signoff Process	20th March 2026	
	– QA metrics basics		09:00 AM to 01:00 PM
	– Test coverage concepts		02:00 AM to 03:00 PM
	– QA signoff process		03:00 PM to 06:00 PM
17	Non-Working Days – Weekend	21st & 22nd March 2026	
18	Daily QA Work – End to End Project Testing	23rd March 2026	
	– End to end testing		09:00 AM to 01:00 PM

Sr. No.	Section / Activity	Date	Time
	– Test execution practice		02:00 AM to 03:00 PM
	– Bug reporting workflow		03:00 PM to 06:00 PM
19	Daily QA Work – Login Module – Functional Testing Execution	24th March 2026	
	– Understand Bussiness Requirements of Project		09:00 AM to 01:00 PM
	– Login validation testing		02:00 AM to 03:00 PM
	– Authentication functionality check		03:00 PM to 06:00 PM
20	Daily QA Work – Register Module – Functional Test Case Execution	25th March 2026	
	– Login Page Testing (Continued) & Validation Checks		09:00 AM to 06:00 PM
21	Daily QA Work – Register Module – Functional Test Case Execution	26th March 2026	
	– Register Page Validation Testing		09:00 AM to 01:00 PM
	– Authentication functionality check		03:00 PM to 06:00 PM
22	Daily QA Work – Cross-Browser Testing	27th March 2026	

Sr. No.	Section / Activity	Date	Time
	– Registration Page Testing (Continued) & Validation Checks		09:00 AM to 06:00 PM
23	Non-Working Days – Weekend	28th & 29th March 2026	
24	Daily QA Work – API Fundamentals & HTTP Methods	30th March 2026	
	– MyAccount dashboard testing		09:00 AM to 01:00 PM
	– User profile validation		03:00 PM to 06:00 PM
25	Daily QA Work – Postman Data-Driven Testing	31th March 2026	
	– MyAccount Page Testing (Continued) & Validation Checks		09:00 AM to 06:00 PM

WEEK 1 REPORT

Date: 2 March 2026

The first day of the internship was focused on onboarding activities and understanding the internal workflow of the organization QAble Testlab Pvt Ltd. An introductory session was conducted to familiarize interns with the tools and reporting structure used within the QA team.

An orientation session on the KEKA HRMS platform was conducted. This tool is used by the organization for attendance tracking, leave management, and daily

work reporting. Basic navigation, login procedures, and reporting methods were explained to ensure that all interns could properly maintain their daily work records and attendance.

The official email signature was also configured according to company standards. This helped in understanding the importance of professional communication and maintaining consistency in internal and external email interactions.

An introductory session on Click Up was also conducted. Click Up is used for:

- Task assignment
- Daily work tracking
- Reporting progress

Key Learnings

- Understood company reporting tools and workflow
- Learned usage of KEKA for attendance and reporting
- Set up professional email communication
- Gained basic understanding of ClickUp task tracking
- Understood milestone monitoring and reporting structure

Overall, the day helped in understanding the organization's workflow and prepared the foundation for upcoming QA activities.

Date: 3 March 2026

The second day focused on building a strong foundation in software testing concepts and QA documentation practices.

An in-depth session was conducted on software testing fundamentals, where the difference between test cases and test scenarios was explained. Various types of testing were studied to understand how quality is ensured throughout the software development lifecycle.

Testing Types Studied

- Regression Testing
- Smoke Testing
- Black Box Testing
- White Box Testing
- Integration Testing
- User Acceptance Testing (UAT)
- Load Testing
- Boundary Testing
- Automation Testing

Concepts of Verification and Validation were also discussed to understand how software is checked at different stages.

The structure of a Test Plan and the importance of proper communication and reporting in QA were explained.

The following QA processes were reviewed:

- Test case design techniques
- Test case review and approval workflow
- Test execution lifecycle
- Reporting structure within QA team

This day provided a clear understanding of how testing activities are planned, documented, and executed in real projects.

Key Learnings

- Strong understanding of testing fundamentals
- Difference between test cases and scenarios
- Test plan structure and execution process
- Importance of QA documentation
- Communication and reporting workflow

Date: 5 March 2026

Module: Functional & UI Testing Excellence Program

Topic Covered: Understanding Software Domains for QA Engineers

Work Done:

- Studied the concept of Software Domains in QA
- Understood the definition of a *domain* as the type of business a software application is built for
- Explored real-world domain examples:
 - Banking
 - Healthcare
 - E-commerce / Grocery
 - Education
 - Travel systems
- Learned the importance of domain knowledge in improving testing accuracy and understanding business logic

Key Learnings:

- Domain knowledge helps in writing better test cases
- Improves requirement understanding
- Helps identify real-world scenarios and edge cases
- Essential for effective functional testing

Date: 6 March 2026

Topic Covered: SDLC, STLC & Testing Levels**Activities performed:**

Work Done:

- Studied SDLC Models with focus on Waterfall vs Agile from QA perspective
- Learned STLC in Real Projects, including Entry & Exit Criteria
- Understood Testing Levels and their practical usage
- Covered Integration Testing with focus on interaction between modules
- Learned concepts of System Testing for end-to-end validation
- Studied User Acceptance Testing (UAT) and its role in client validation

Key Learnings:

- Difference between Waterfall and Agile methodologies in testing lifecycle
- Importance of Entry & Exit Criteria for quality control in STLC
- Clear understanding of Testing Levels:
 - Unit Testing (basic idea)
 - Integration Testing (module interaction)
 - System Testing (complete system validation)
 - UAT (business/user validation)
- Learned how testing aligns with different phases of SDLC

WEEK 2 REPORT

Date: 9 March 2026

- **Topic Covered:** Testing Types & Test Strategy
- **Work Done:**
 - Studied Functional vs Non-Functional Testing and their scope in QA
 - Learned Smoke Testing vs Sanity Testing for build validation
 - Understood Regression Testing vs Retesting concepts
 - Explored Exploratory Testing vs Ad-hoc Testing approaches

- Covered End-to-End (E2E) Testing for complete workflow validation
- Learned Positive vs Negative Testing scenarios
- Studied Risk-Based Testing & Test Prioritization
- **Key Learnings:**
 - Difference between Functional (what system does) and Non-Functional (how system performs) testing
 - Importance of Smoke Testing to check build stability before detailed testing
 - Clear distinction between:
 - Retesting (verify fixed defects)
 - Regression Testing (ensure no new issues after changes)
 - Exploratory testing helps in finding unknown defects without predefined test cases
 - End-to-End testing validates complete business flow
 - Positive testing checks valid inputs, while negative testing ensures error handling
 - Risk-based testing helps prioritize critical features first

Date: 10 March 2026

Topic Covered: Defect Fundamentals

Work Done:

- Studied Defects from Business & User Impact Perspective
- Learned reasons Why Defects Occur & Escape to Production
- Understood Defect Life Cycle (Real Project Flow)
- Covered Severity vs Priority with context-based examples
- Learned Defect Statuses & Ownership

- Studied Bug Rejection Reasons & QA Response handling

Key Learnings:

- Defects should be analyzed based on business impact and user experience
- Common causes of defects:
 - Requirement gaps
 - Miscommunication
 - Incomplete testing
- Understood complete Defect Life Cycle:
 - New → Assigned → Open → Fixed → Retest → Closed / Reopen
- Clear difference between:
 - Severity (impact of defect)
 - Priority (urgency to fix)
- Learned how defect ownership shifts between QA, Developer, and Stakeholders
- Understood valid reasons for bug rejection (invalid, duplicate, cannot reproduce, etc.)
- Importance of proper QA response and justification

Date: 11 March 2026

- **Topic Covered:** Requirement Understanding & Risk
- **Work Done:**
 - Studied Reading Requirements Like a QA approach
 - Learned Acceptance Criteria and its practical usage in testing
 - Identified Requirement Gaps & Ambiguities
 - Understood Risk Identification in Requirements

- Covered Happy Path vs Failure Path scenarios
- Learned about Assumptions, Dependencies & Constraints
- **Key Learnings:**
- Importance of analyzing requirements from a QA mindset (questioning & validation)
- Acceptance criteria helps define clear test conditions and expected outcomes
- Ability to identify:
- Missing requirements
- Ambiguous statements
- Incomplete flows
- Risk identification helps prioritize critical functionalities early
- Difference between:
- Happy Path → Valid user flow
- Failure Path → Invalid/error scenarios
- Understanding assumptions, dependencies, and constraints ensures better test planning

Date: 12 March 2026

- **Topic Covered:** Test Scenario & Test Case Design
- Work Done:
- Studied Test Scenarios – Identification & Purpose
- Learned Test Case Writing – Structure & Best Practices
- Covered Positive, Negative & Edge Case Design
- Understood Test Case Design Techniques:

- BVA (Boundary Value Analysis)
- EP (Equivalence Partitioning)
- Decision Table
- Learned Maintaining Test Cases Across Releases
- **Key Learnings:**
- Test scenarios provide high-level coverage of application functionality
- Well-structured test cases improve clarity, reusability, and execution efficiency
- Importance of covering:
- Positive cases (valid flow)
- Negative cases (invalid inputs)
- Edge cases (boundary conditions)
- Design techniques help in reducing redundant test cases while increasing coverage
- Maintaining test cases ensures consistency and relevance across multiple releases

Date: 13 March 2026

Topic Covered: Test Execution & Build Validation

Work Done:

- Studied Test Execution Workflow in real project scenarios
- Learned Smoke Testing Before Execution to validate build stability
- Understood Pass / Fail / Blocked status decisions during execution
- Covered Retesting & Regression Testing in practice

- Learned handling of Blockers & Dependencies during testing
- Completed Phase 7 Assessment

Key Learnings:

- Test execution follows a structured flow:
 - Environment setup → Smoke testing → Test execution → Defect logging → Retesting → Regression
- Smoke testing ensures build is stable before detailed testing
- Clear understanding of execution status:
 - Pass → Expected result achieved
 - Fail → Defect identified
 - Blocked → Cannot proceed due to dependency/issue
- Retesting verifies fixed defects, while regression ensures no impact on existing functionality
- Learned strategies to manage:
 - Blockers (environment issues, missing access, etc.)
 - Dependencies between modules

WEEK 3 REPORT

Date: 16 March 2026

Topic Covered: Bug Reporting & QA Communication

Work Done:

- Studied Writing High-Quality Bug Reports
- Learned Mapping Bugs to Test Cases
- Understood handling of Rejected / Duplicate Bugs

- Covered QA Communication with Development & Product Teams
- Completed Phase 8 Assessment

Key Learnings:

- A good bug report should include:
 - Clear title
 - Steps to reproduce
 - Expected vs Actual result
 - Severity & Priority
 - Attachments (screenshots/logs)
 - Mapping bugs to test cases helps in traceability and coverage tracking
 - Learned how to handle:
 - **Rejected bugs** (invalid, not reproducible, works as expected)
 - **Duplicate bugs** (linking with existing defects)
 - Effective QA communication ensures:
 - Faster defect resolution
 - Better collaboration with Dev & Product teams
 - Importance of clear, concise, and professional communication in QA
-

Date: 17 March 2026

Topic Covered: QA Documentation & Client Reporting

Work Done:

- Studied QA Daily Status Report (DSR) structure and usage
- Learned Weekly & Monthly QA Status Reporting formats
- Understood Release Sign-off Report and its importance

- Covered Project Sign-off Report for final delivery validation
- Learned Test Strategy (QA Thinking Level)
- Studied Test Plan (Execution Blueprint)

Key Learnings:

- DSR helps track daily progress, blockers, and next steps
- Weekly/Monthly reports provide overall project health and metrics
- Release sign-off ensures:
 - Application is stable
 - Critical defects are resolved
- Project sign-off confirms final approval from stakeholders
- Test strategy defines:
 - Scope of testing
 - Approach & techniques
 - Risk handling
- Test plan acts as a complete execution guide including:
 - Resources
 - Timeline
 - Scope & deliverables

Date: 18 March 2026

- **Topic Covered:** UI, Mobile, Cross-Browser & Responsive Testing
- **Work Done:**
- Studied UI vs UX Testing concepts
- Learned Mobile Testing fundamentals
- Covered Cross-Browser Testing

- Understood Responsive Testing across devices
- Learned Cookies, Sessions & UI State Validation
- Completed Assessment
- **Key Learnings:**
 - Difference between:
 - **UI Testing** → Visual elements, layout, design validation
 - **UX Testing** → User experience, usability, and flow
 - Mobile testing includes:
 - Device compatibility
 - OS version testing
 - Performance and usability checks
 - Cross-browser testing ensures application works consistently on:
 - Chrome, Firefox, Edge, Safari
 - Responsive testing validates UI behavior across:
 - Mobile, Tablet, Desktop screen sizes
 - Learned importance of:
 - **Cookies** → Store user data/session info
 - **Sessions** → Maintain user login/state
 - **UI State Validation** → Ensure correct UI behavior after actions

Date:19 March 2026

Topic Covered: Agile QA & Real-World Execution

Work Done:

- Studied QA Role in Agile / Scrum methodology
- Learned Sprint Testing Flow in real-time projects

- Understood Daily Stand-ups from QA Perspective
- Covered Handling Last-Minute Changes in Agile environment
- Learned Time-Boxed Testing Strategies
- Completed Phase 11 Assessment

Key Learnings:

- QA plays an active role in Agile:
 - Requirement analysis
 - Continuous testing
 - Collaboration with Dev & Product teams
- Sprint testing involves:
 - Requirement understanding
 - Test case creation
 - Continuous execution within sprint timeline
- Daily stand-ups help in:
 - Sharing progress
 - Highlighting blockers
 - Aligning with team goals
- Learned strategies to handle:
 - Last-minute changes without impacting delivery
- Time-boxed testing ensures:
 - Maximum coverage within limited sprint time
 - Prioritization of critical features

Date: 20 march 2026

- **Topic Covered:** Metrics, Reporting & QA Sign-off

- **Work Done:**
- Studied QA Metrics That Matter
- Learned Test Coverage & Defect Metrics
- Understood QA Go / No-Go Decision Process
- Covered Final QA Sign-off Responsibilities
- Completed Assessment
- **Key Learnings:**
- QA metrics help track:
- Test execution progress
- Defect trends
- Overall product quality
- Important metrics include:
- **Test Coverage** → % of functionality tested
- **Defect Density** → Defects per module
- **Defect Leakage** → Bugs found in production
- Go / No-Go decision depends on:
- Critical defects status
- Test coverage completion
- Business readiness
- QA sign-off ensures:
- Application is stable and meets requirements
- All critical issues are resolved or accepted

WEEK 4 REPORT

Date: 23March 2026

- **Topic Covered:** End-to-End Project Simulation
- **Work Done:**
 - Performed Requirement Analysis for project scenarios
 - Created Test Cases based on requirements
 - Executed test cases during Test Execution phase
 - Reported defects using proper Bug Reporting format
 - Prepared Documentation & QA Reports
 - Completed QA Sign-off process
 - Finished Assessment
- **Key Learnings:**
 - Understood complete end-to-end QA workflow from requirement to release
 - Learned how to:
 - Analyze requirements and identify test scenarios
 - Write effective and structured test cases
 - Execute test cases and log defects accurately
 - Gained hands-on experience in:
 - Defect tracking and reporting
 - Test documentation and reporting
 - Understood importance of QA Sign-off before release
 - Experienced real-time simulation of project lifecycle in QA

Date: 24 March 2026

Topic Covered: QA Readiness Evaluation

Work Done:

- Completed **Self Review** of QA concepts
- Understand OpenCart project business requirements.
- Reviewed previously learned topics and applied them in test case design
- Work on login page test case and test scenario.

Test Case ID	Module	Test Scenario	Preconditions	Test Steps	Test Data	Expected Result	Actual Result	Status	Priority	Severity
TC_L_01	Login	Verify Login with valid Email and Password	User account is registered	1. Open Browser 2. Enter opencart demo URL 3. Click on MyAccount 4. Click on login button	Email: harshrank2003@gmail.com Password: 123456	User is successfully logged in	User is successfully logged in	Pass		
TC_L_02	Login	Verify Login with valid Email and invalid Password	User account is registered	1. Open Browser 2. Enter opencart demo URL 3. Click on MyAccount 4. Click on login button	Email: harshrank2003@gmail.com Password: 120000	User should not able to logged in and Error message should be displayed	Error Message displayed: "No match for E-Mail Address and/or Password."	Pass		
TC_L_03	Login	Verify Login with invalid Email and valid Password	User account is registered	1. Open Browser 2. Enter opencart demo URL 3. Click on MyAccount 4. Click on login button	Email: harsh2003@gmail.com Password: 123456	User should not able to logged in and Error message should be displayed	Error Message displayed: "No match for E-Mail Address and/or Password."	Pass		
TC_L_04	Login	Verify Login with invalid Email and invalid Password	User account is registered	1. Open Browser 2. Enter opencart demo URL 3. Click on MyAccount 4. Click on login button	Email: harsh2003@gmail.com Password: 123456	User should not able to logged in and Error message should be displayed	Error Message displayed: "No match for E-Mail Address and/or Password."	Pass		
TC_L_05	Login	Verify Login with empty field	User account is registered	1. Open Browser 2. Enter opencart demo URL 3. Click on MyAccount 4. Click on login button	Email: Password:	User should not able to logged in and Error message should be displayed	Error Message displayed: "No match for E-Mail Address and/or Password."	Pass		
TC_L_06	Login	Verify User Click Login Button	User account is registered	1. Open Browser 2. Enter opencart demo URL 3. Click on MyAccount 4. Click on login button	Email: harshrank2003@gmail.com Password: 123456	When the user clicks the Login button, they can able to login successfully.	User is able to log in successfully.	Pass		
TC_L_07	Login	Verify After press the login button user redirect to home page	User account is registered	1. Open Browser 2. Enter opencart demo URL 3. Click on MyAccount 4. Click on login button	Email: harshrank2003@gmail.com Password: 123456	When user click on login button user should be redirect to home page	User redirect to MyAccount page	Fail	High	High

Date: 25 March 2026

Work Done: Work on Login Web Page of OpenCart Project.

TC_L_08	Login	Verify User enter Email with Space	User account is registered	1. Open Browser 2. Enter opencart demo URL 3. Click on MyAccount 4. Click on login button	Email: harshrank2003@gmail.com Password: 123456	When user enter an Email with whitespace User get an error message	Error Message displayed: "No match for E-Mail Address and/or Password."	Pass		
TC_L_09	Login	Verify that the password entered by the user is hidden in the password input field	User account is registered	1. Open Browser 2. Enter opencart demo URL 3. Click on MyAccount 4. Click on login button	Email: harshrank2003@gmail.com Password: 123456	When user entered password the password should be displayed as hidden.	When user enter a password in input filed password is not visible	Pass		
TC_L_10	Logout	Verify logout functionality	User logged in to the site	1. Open MyAccount. 2. Click on Logout		When user click on logout user should be redirect to login page.	User redirect to dashboard.	Fail		
TC_L_11	Login	Verify clicking on Eye icon on Password field	User account is registered	1. Open MyAccount. 2. Click on Login	Email: harshrank2003@gmail.com Password: 123456	When the user enter Password, the password should get visible and hide as per the action	In the password filed there is no eye icon to check the password.	Fail	High	High
TC_L_12	Login --> Forgot Password	Verify that when the user clicks on the "Forgot Password" option and submits a valid email address, a password reset email is sent to the registered email ID.	User account is registered	1. Open MyAccount. 2. Click on Login	Email: harshrank2003@gmail.com	When the user clicks on forgot password, then the password reset link should be sent on registered email.	Password reset link is not received in the email after requesting password reset.	Fail	High	High
TC_L_13	Login	Verify that after refresh the web pages user remain logged in.	User account is registered	1. Open MyAccount. 2. Click on Login		After refresh the web page user should be remain logged in	User is remain logged in	Pass		
TC_L_14	Login	Verify login in multiple browsers with same account	User account is registered	1. Open MyAccount. 2. Click on Login		User should be able to log in to multiple browsers	User can log in to multiple browsers	Pass		

Date: 26 March 2026

Work Done:

- Understand Register page and create test strategy
- Work on Register page of project

Test Case ID	Module	Test Scenario	Preconditions	Test Steps	Test Data	Expected Result	Actual Result	Status	Priority	Severity
Fun_Reg_001	Register	Verify password must be between 4 and 20 characters	User on the Dashboard of the site	1. Click on MyAccount 2. Click on Register		User should not be able to register with a 3-digit password.	User can not able to register with a 3-dijit password.	Pass		
Fun_Reg_002	Register	Verify password must be between 4 and 20 characters	User on the Dashboard of the site	1. Click on MyAccount 2. Click on Register		User should not be able to register with a 21-digit password.	User can not able to register with a 21-dijit password.	Pass		
Fun_Reg_003	Register	Verify that the password entered by the user is hidden in the password input field	User on the MyAccount page	1. Click on MyAccount 2. Click on Register		when the user enters a password during account creation, the password should be visible when the user clicks the eye icon.	Password visibility (eye icon) option is not available in the password field.	fail		
Fun_Reg_004	Register	Register page load successfully on browser.	User on the Dashboard of the site	1. Click on MyAccount 2. Click on Register		When the user click on register button, the register page should load successfully	register page load successfully.	Pass		
Fun_Reg_005	Register	All the button on register page is working correctly.	User on the Dashboard of the site	1. Click on MyAccount 2. Click on Register		When user on the register page in that time submit and toggle buttons work correctly.	submit and toggle buttons are work correctly	Pass		
Fun_Reg_006	Register	User can able to register without accept Privacy policy button	User on the Dashboard of the site	1. Click on MyAccount 2. Click on Register		User should not able to register account without agree the privacy policy	User can not able to register without agree privacy policy	Pass		
Fun_Reg_007	Register	User must fill all the mandatory fields to register the account.	User on the Dashboard of the site	1. Click on MyAccount 2. Click on Register		User should not be able to register without filling all mandatory fields.	User can not able to register without filling all mandatory fields.	Pass		

Fun_Reg_008	Register	After the result user redirect to login page successfully.	User on the Dashboard of the site	1. Click on MyAccount 2. Click on Register		When the user clicks the Continue button, the user should be redirected to the login page.	User redirect to MyAccount page	Pass		
Fun_Reg_009	Register	All fields on the registration page should accept valid input and follow proper validation rules.	User on the Dashboard of the site	1. Click on MyAccount 2. Click on Register		User must have to add valid email with proper validation rules. (EX: @, gamil.com, etc..)	System allows registration even when an invalid email domain (e.g., "domeytext.com") is entered after '@'.	Fail		
Fun_Reg_010	Register	First Name should not accept numeric input	User on registration page	1. Click on MyAccount 2. Click on Register	Enter "123" in First Name	Error message should be displayed	Field accepts numbers	Fail		
Fun_Reg_011	Register	First Name should not accept special characters	User on registration page	1. Click on MyAccount 2. Click on Register	Enter "#\$@"	Error message should be displayed	Accepts special chars	Fail		
Fun_Reg_012	Register	First Name should not accept alphanumeric input	User on registration page	1. Click on MyAccount 2. Click on Register	Enter "ab12"	Error message should be displayed	Accepts invalid input	Fail		
Fun_Reg_013	Register	First Name invalid input without warning	User on registration page	1. Click on MyAccount 2. Click on Register	Enter "abc12%#"	Warning should be displayed	No warning shown	Fail
